

We pride ourselves on providing our patients with the best possible standard of care. **Because of this, we now perform the Optomap® Retinal Exam with all of our patients.** When reviewed, the scan becomes a permanent part of your medical file, enabling the doctor to make important comparisons should potential vision threatening conditions show themselves at a future examination. **The Doctors strongly believe that the Optomap® Retinal Exam is an essential part of your comprehensive eye exam and prescribes it for all patients once per year.**

As part of your pre-test work up, we will capture Optomap® images for review with the doctors during your examination today. There is a \$25 co-pay for this procedure. This service may be covered if being used to actively follow disease. If you choose to have and Optomap®, the doctor may not need to dilate your eyes. Any questions you have about the Optomap® Retinal Exam can be directed to the doctor when he reviews the images with you during your examination.
